

**SANTALUCIA MOBILI**

METRON

Dear Reseller,

we are offering you the new suite of programs for the graphic loading of orders, Metron.  
This is characterized by having intuitive graphic order loading, simplified rendering, automatic printing and layout, sending orders online with a simple click, all integrated in the same design environment.

All Santalucia Mobili products are available:

**SANTALUCIA MOBILI**

**IKONA**

**HOMY**

**PRATICO**

**Innova Living**

**Wardrobes Night**

**Pratico Night**

**Dandy Living**

**Ranges and Beds Night**

**Pratico Living**

**Walk-in wardrobes Night**

**Day Living**

## MAIN FEATURES OF METRON

### Index:

_ Simple user-mobile interaction with the “click and move” technique	4
_ Graphic interface for the definition of the set-up	4
_ Automatic calculation of prices (including oversized prices listed in the price list)	4
_ Automatic generation of quotes (including technical and commercial prints)	5
_ Automatic dimensioning system that can be integrated manually	5
_ Ability to build complex and realistic rooms	5
_ Ability to automatically or manually hide objects that disturb the view	6
_ Possibility to open, even partially, doors and drawers	6
_ Possibility to export the graphic composition in DXF / DWG formats	6
_ Availability of furnishing object libraries	7
_ Available in Italian, English, French languages	7
_ Automatic sending of the order to the company via the web	7

## MAIN FEATURES OF METRON

### \_ Simple user-mobile interaction with the “click and move” technique

Click on the icon of the chosen article / composition and drag it, while holding the mouse down. You can place the article in an exact point of the room.

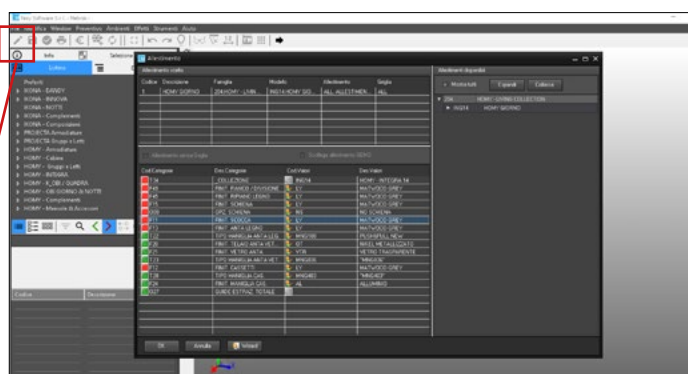

Alternatively, by double clicking directly on the icon, the selected element will be positioned automatically near the corner.

### \_ Graphic interface for the definition of the set-up

Using the “Edit” tool on Metron we can define the set -up of the composition that it will be created.

The set-up is useful for not having to define the variations to each article inserted in the composition.

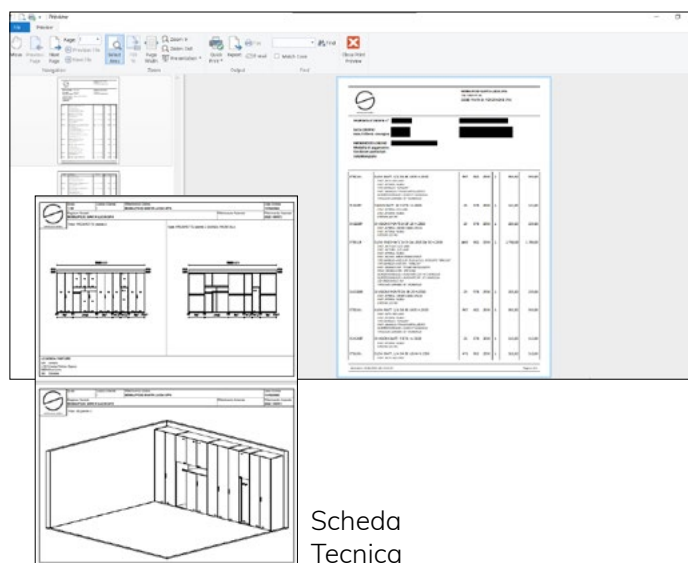

### \_ Automatic calculation of prices (including oversized prices listed in the price list)

Going to the “Distinct” section of Metron you can view the automatically calculated price of the entire composition created.

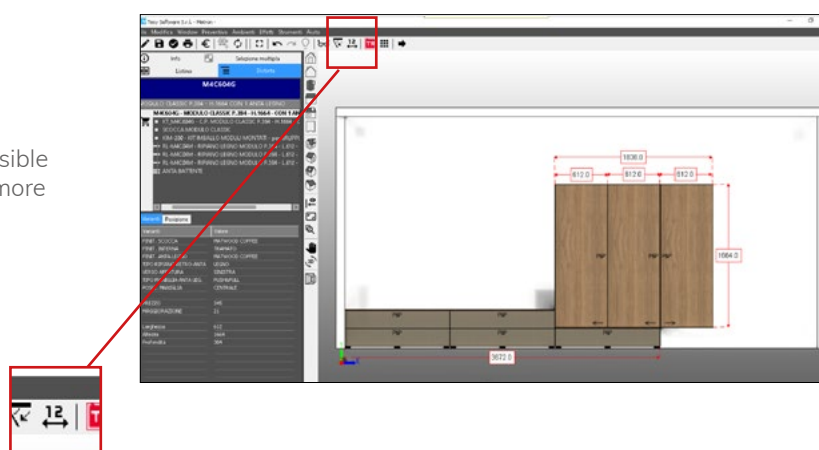

## \_ Automatic generation of quotes (including technical and commercial prints)

The document concerned is automatically generated using the **“Quote Preview”** tool.

## \_ Automatic dimensioning system that can be integrated manually

Through the **“Dimensions”** function it is possible to view all the measures involved in one or more elements of a composition.

## \_ Ability to build complex and realistic rooms

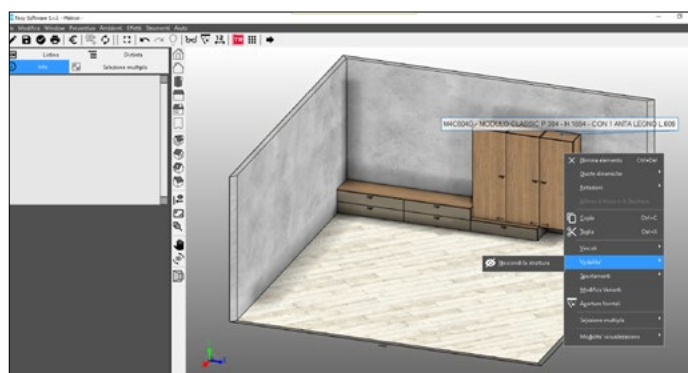

Using the **“Rooms”** function, you can add elements, such as windows, doors, etc., to see how the composition integrates with the surrounding environment.

## \_ Ability to automatically or manually hide objects that disturb the view

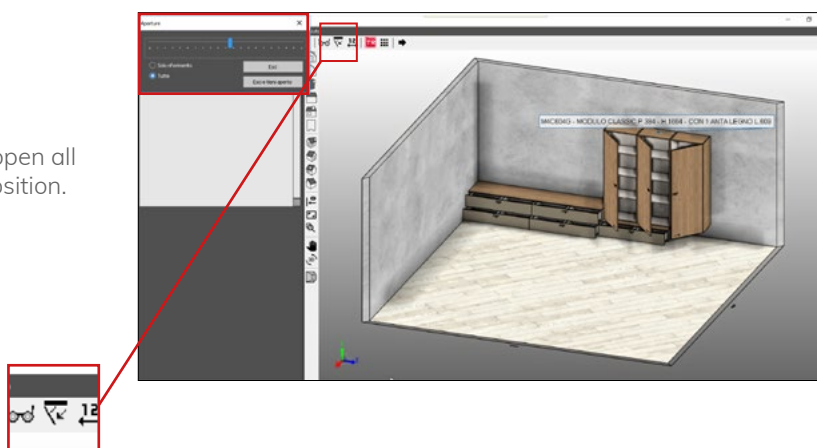

Click the right mouse button and select the **“Visibility> Hide structure”** operation from the drop-down menu. You can temporarily hide the selected element.

Same operation to show previously hidden items.

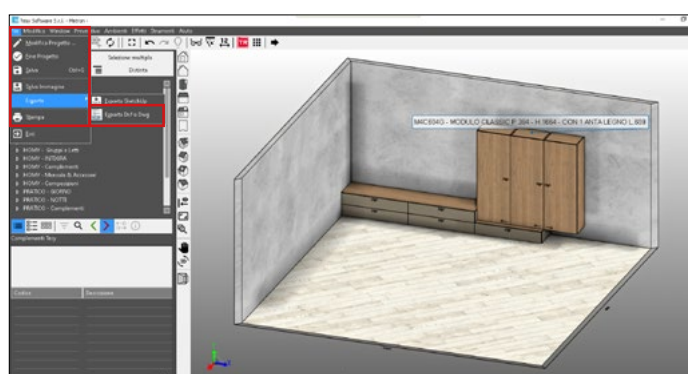

## \_ Possibility to open, even partially, doors and drawers

Through the **“Front Opening”** tool you can open all the doors and drawers present in the composition.

## \_ Possibility to export the graphic composition in DXF / DWG formats

Through the **“File> Export”** operation, you can choose the format with which you want to export the created order graphics.

### \_ Availability of furnishing object libraries

In the **“Tesy Complements”** section of the Metron menu, you can insert furniture items, such as television, lamps, carpets, etc.

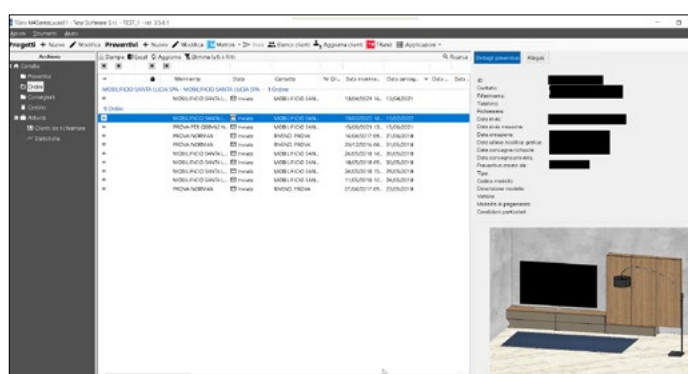

### \_ Available in Italian, English, French languages

Through T\_Geo Resellers, the language is automatically set based on the reference reseller code.

### \_ Automatic sending of the order to the company via the web

After setting the graphics, the order is sent via the **“Quotes”** section of T\_Geo.

## SUITE METRON - Included Programs

### METRON

Graphic Configurator

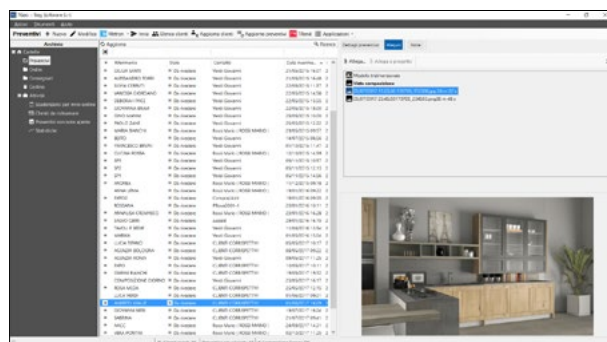

### T\_RENDER

Basic Rendering Module

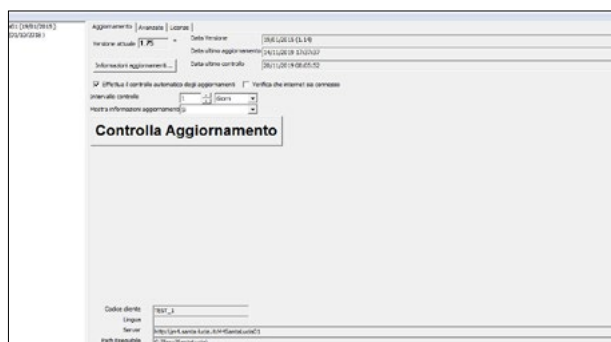

### T\_PRINT

Custom Print Manager

### T\_GEO

Order and Quote Manager

### T\_AGGIORNA

Online Update Manager

Graphic Configurator (multi-company)

## INSTALLATION

Santalucia Mobili has delegated Tesy Software to the distribution and management of the licenses of all the applications of the Metron suite.

Reason for which, with regard to installations, software assistance, purchase of licenses, renewals of fees, please contact:

Tesy Software s.r.l. - Via Reginato, 3 - 31100 Treviso (TV)

T: +39 0422 230004 - F: +39 0422 431692

E-mail: [assistenza@tesysoftware.com](mailto:assistenza@tesysoftware.com)

To activate Metron, request the installation CD or access the following link via browser:

<https://tesydvd.blob.core.windows.net/santalucia/Setup-METRON-Santalucia.exe>

Once the program has been installed on your PC, you will need to contact Tesy Software again in order to obtain the access key.

---

## SYSTEM REQUIREMENTS

### Minimum requirements:

_Processor:	Intel® Core™ I5 o I7 with speed higher than 2,5 GHz
_Ram Memory:	16 GB
_Graphic/Video Card:	1 GB or higher dedicated OpenGL and DirectX compatible
_Hard Disk:	500 GB
_Internet Connection:	Yes
_Operating System:	Windows 8 (64bit), Windows 10 (64bit)

### Recommended requirements:

_Processor:	Intel® Core™ I5 o I7 with speed higher than 23,4 GHz
_Ram Memory:	16/32 GB
_Graphic/Video Card:	Nvidia GTX 1650 or higher
_Hard Disk:	500 GB SSD
_Internet Connection:	Sì
_Operating System:	Windows 10 (64bit)

Operation on Apple machines is only possible by installing the program on a virtual machine with a Windows operating system (for example using the “Parallels” software) or by creating a partition with a Windows operating system on the machine (for example using the “Boot Camp” software ). <https://tesydvd>.
