Le nuove varianti di finiture offrono una vasta gamma di opzioni per valorizzare ogni ambiente con eleganza. Le texture lignee portano carattere in ogni spazio, mentre le finiture monocrome e materiche conferiscono un tocco di modernità, creando superfici dall'aspetto ricercato e unico. L'insieme delle tinte garantisce infine un'armonia cromatica perfetta, adattandosi a qualsiasi stile e atmosfera.

EN_

The new finishes offer a wide range of different options for enhancing every room in style. The wood textures bring character to every space, while the single-colour and textured finishes add a touch of modernity, creating surfaces with a unique and sophisticated look. Finally, the combination of the different shades guarantees perfect colour harmony, adapting to any style and vibe.

Le mensole con spessore di 35 mm offrono soluzioni per ogni esigenza e, grazie alla disponibilità anche su misura, sono facilmente adattabili a diverse situazioni. Utili per esporre oggetti e organizzare gli spazi, aggiungono un tocco decorativo, valorizzando ogni ambiente con stile e funzionalità. Sono disponibili in diverse finiture e applicazioni.

EN_

35 mm shelves are versatile solutions for all storage needs. Also available in bespoke sizes, they can be easily adapted to any situation. Perfect for displaying objects and organising spaces, they add a decorative touch to every setting, enhancing rooms with style and functionality. Available in different finishes and applications.

Il programma Pratico Giorno è concepito come un gioco di sporgenze e posizionamenti, creando un senso di dinamismo che arricchisce lo spazio con un tocco di unicità e stile. Ogni elemento diventa protagonista, dando vita a combinazioni originali che stimolano la percezione dell'ambiente in modo creativo. Perfetto per chi desidera personalizzare gli spazi con soluzioni di design.

EN_

The Pratico Living Room collection is a dynamic exploration of protrusions and positioning that enriches the space with originality and style. Every element has a role to play, resulting in innovative combinations that offer a creative new take on the living room. Perfect for those that want to personalise their spaces with design solutions.

In una composizione free standing come questa, la panca autoportante su un lato poggia direttamente sulla base, diventando motivo di ordine compositivo e offrendo un comodo e decorativo piano d'appoggio. L'armonia tra linee moderne e funzionalità rende queste soluzioni ideali per chi cerca un arredamento contemporaneo. Perfette per chi desidera arredare senza rinunciare alla praticità e alla versatilità degli spazi.

EN_

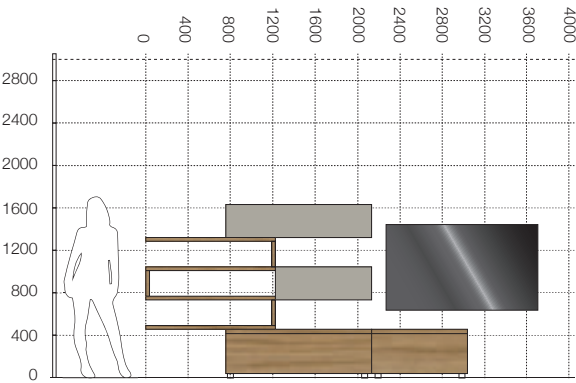

In a free-standing composition like this one, one end of the self-supporting bench sits directly on the base unit, becoming a motif of compositional order while offering a practical and decorative surface space at the same time. The harmony between the modern lines and the functionality of these solutions make them ideal for lovers of contemporary interiors. Perfect for those that want to furnish their spaces without compromising on practicality and versatility.

L'utilizzo delle mensole Cento spesse 104 mm arricchisce la composizione, conferendo forza e creando un impatto scenografico senza pari. Si tratta di elementi funzionali e decorativi, disponibili in tutte le finiture del programma e concepiti per un utilizzo libero. A volte sostengono altri elementi, altre volte separano gli spazi, e in altri casi svolgono una funzione di porta TV, soprattutto se combinati con la boiserie. I mensoloni conferiscono sempre carattere e personalità agli ambienti in cui vengono inseriti.

EN_

The use of Cento 104 mm shelves elevates the composition, giving it strength and unparalleled visual impact. These functional and decorative elements are available in all finishes in the collection and designed to be used in total freedom. Sometimes they support other elements, sometimes they divide spaces, other times they function as TV stands, particularly when combined with wood panelling. Thick shelving always adds character and personality to spaces.

Il modulo Light, posizionato tra due pensili, crea un interessante gioco di pieni e vuoti, conferendo all'ambiente un aspetto dinamico e moderno. La differenza di profondità tra il modulo e i pensili circostanti si ispira all'architettura razionalista, che costituisce la base delle più originali e attuali realizzazioni edilizie.

EN_

The Light module, positioned between two wall units, creates an interesting solid and void effect, giving the room a modern and dynamic feel. The difference in depth between the module and the surrounding wall units is inspired by rationalist architecture, the basis for the most original and modern construction solutions.

Le diverse profondità degli elementi diventano il motivo distintivo della composizione, creano un gioco di luci e ombre che esaltano la volumetria. In situazioni come questa, è consigliabile mantenere la maniglia a gola nella stessa tinta del contenitore, riducendo al minimo la sua visibilità.

EN_

The varying depths of the elements become the hallmark of the composition, creating a light and shade effect that underlines the differences in the volumes. In situations like this, it is better to keep the grip-recess handle in the same colour as the storage unit, reducing its visibility to a minimum.

Le ante Sbieko offrono giochi di geometrie sempre molto interessanti, creando un effetto visivo intrigante e moderno. I tagli sono dinamici e possono essere combinati in vari modi per ottenere decori sempre diversi. Ad esempio, combinando due ante destre non si ottiene lo stesso gioco di pieni e vuoti che si crea combinando un'anta destra con una sinistra. Nelle foto seguenti è possibile apprezzare tutte le possibili varianti.

EN_

Sbieko doors always offer plenty of interesting geometries, creating modern and intriguing visual effects. The cuts are dynamic and can be combined in various ways to produce different decorative effects every time. For example, when combining two right-hand doors you don't get the same solid and void effect produced by combining a right-hand and a left-hand door. The following photos show all of the possible different solutions.

Una caratteristica interessante delle ante Sbieko è il vuoto che esse creano, permettendo di apprezzare la stessa finitura tra l'anta e la struttura, oppure di scegliere un contrasto. La scelta tra finitura in contrasto o meno è ovviamente soggettiva e dipende dall'ambiente. In questo caso, lavorando con cromie sobrie, abbiamo optato per un maggiore rigore nell'insieme.

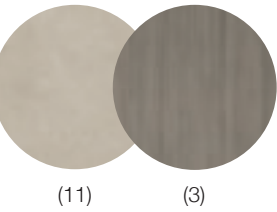

EN_

One interesting characteristic of Sbieko doors is the void that they create, making it possible to admire the same finish on the doors and the structure, or to opt for contrasting finishes. Deciding whether or not to choose a contrasting finish is subjective and dependent on the space. In this case, working with understated colours, we have opted for a more austere overall effect.

La possibilità di avere tutte le finiture su ogni superficie non è affatto un'opzione da sottovalutare. Dalle ante alle mensole, dalle maniglie ai maniglioni, fino a tutti gli elementi costruttivi, possiamo applicare la stessa tinta e finitura. Questa opzione valorizza le composizioni, rendendole più sobrie e durevoli nel tempo e offre ad ogni ambiente carattere e dinamicità.

EN_

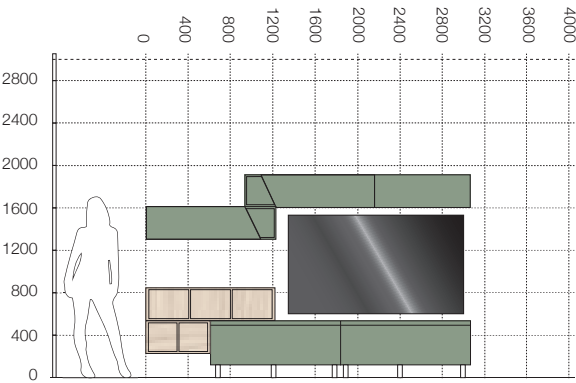

The possibility of having all finishes on every surface is not to be underestimated. We can apply the same colour and finish to everything from doors and shelves to handles and all other construction elements. This option enhances your compositions, making them more discreet and durable while adding character and dynamism to every space.

Anche gli elementi metallici sono realizzati nelle stesse tinte proposte per le altre superfici, permettendo lo sviluppo progettuale concepito per il programma Pratico Giorno: versatilità cromatica, con l'uso di superfici in contrasto o monocromatiche, e volumetria, in un gioco di profondità e spessori differenti. Alcuni di essi sono dotati di LED perimetrali che ne esaltano la presenza, fornendo luci di cortesia nell'ambiente.

EN_

Metal elements are also produced in the same colours as the other surfaces, permitting design projects in line with the Pratico Living Room concept of colour variety, using contrasting or plain colour surfaces, and versatile volumes, with compositions that stand out for their alternating depths and thicknesses. Some of these elements come with perimeter LED lighting which emphasise their presence, providing the space with courtesy lights.

IT_

I vani a giorno sono una colonna portante di ogni sistema Giorno, sia per la loro funzione decorativa, che esalta gli oggetti grazie all'effetto cornice, sia per il loro ruolo di contenitori facilmente accessibili. Nel programma Pratico sono disponibili in tutte le finiture, offrendo, seppur in modo poco comune, la possibilità di creare composizioni monocrome o monomateriche grazie ad una sapiente combinazione di tinte e finiture.

EN_

Open compartments are a key feature of every Living Room range both because of their decorative function, which showcases objects thanks to the frame effect, and their role as easy-to-access storage spaces. In the Pratico range they are available in all finishes, offering the unusual possibility of creating single-colour or single-material compositions, thanks to the expert combination of shades and finishes.

IT_

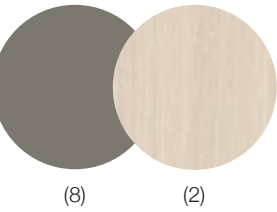

La boiserie è un pannello decorativo che, come in questo caso, caratterizza la composizione, riequilibrando la distribuzione dei pesi cromatici e delle masse volumetriche. In alcuni casi, come nelle pagine successive, vedremo come questa svolga anche il ruolo di porta-abiti, particolarmente utile nei monolocali, dove l’ottimizzazione degli spazi è fondamentale.

EN_

Wall panels are decorative elements that characterise the composition, as seen here, balancing the distribution of colours and volumes. In some cases, like those on the following pages, they can also be used to hang clothes, a particularly useful feature in studio flats where optimising space is essential.

IT_

Abbiamo voluto proporre il sistema Pratico in una chiave più vincolata e rigorosa, tipica delle credenze o delle madie della nostra tradizione. In alcuni casi, le composizioni si rivelano anche interessanti contenitori per zone di transito, come ingressi o passaggi verso la zona notte.

EN_

We wanted to present the Pratico range in the more rigid and austere setting typically associated with traditional Italian sideboards and cabinets. In some cases, the compositions also prove to be interesting storage spaces for connecting areas like entrances or bedroom corridors.
